”SMART SOLUTION FOR A SMARTER FUTURE”

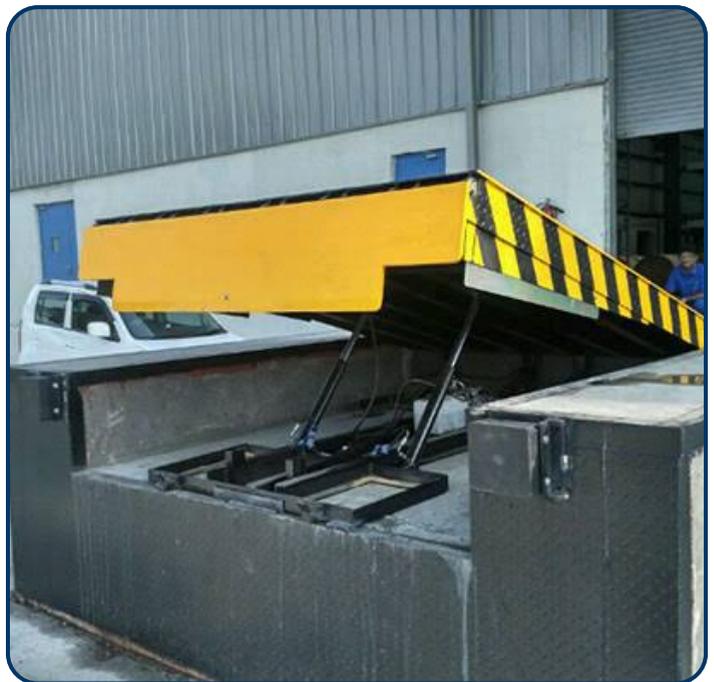

Established in 2016, RISING AUTOMATION has been a leading provider of advanced automation solutions, delivering excellence in automatic doors, sliding gates, boom barriers, dock levelers, dock shelters, access control systems, and industrial security solutions. With years of expertise and a commitment to innovation, we have successfully catered to residential, commercial, and industrial sectors, providing high-quality, durable, and technologically advanced products. Our automation systems are designed to enhance security, efficiency, and convenience, integrating smart technology and precision engineering for seamless operation. Whether it's automated entry systems, traffic management solutions, or warehouse loading dock equipment, we ensure that our products meet the highest standards of quality, safety, and reliability. At RISING AUTOMATION, we prioritize customer satisfaction, offering customized solutions, expert consultation, professional installation, and dedicated after-sales service. As a trusted name in the automation industry, we continue to push the boundaries of technology, making spaces smarter and operations smoother.

DOCK LEVLER

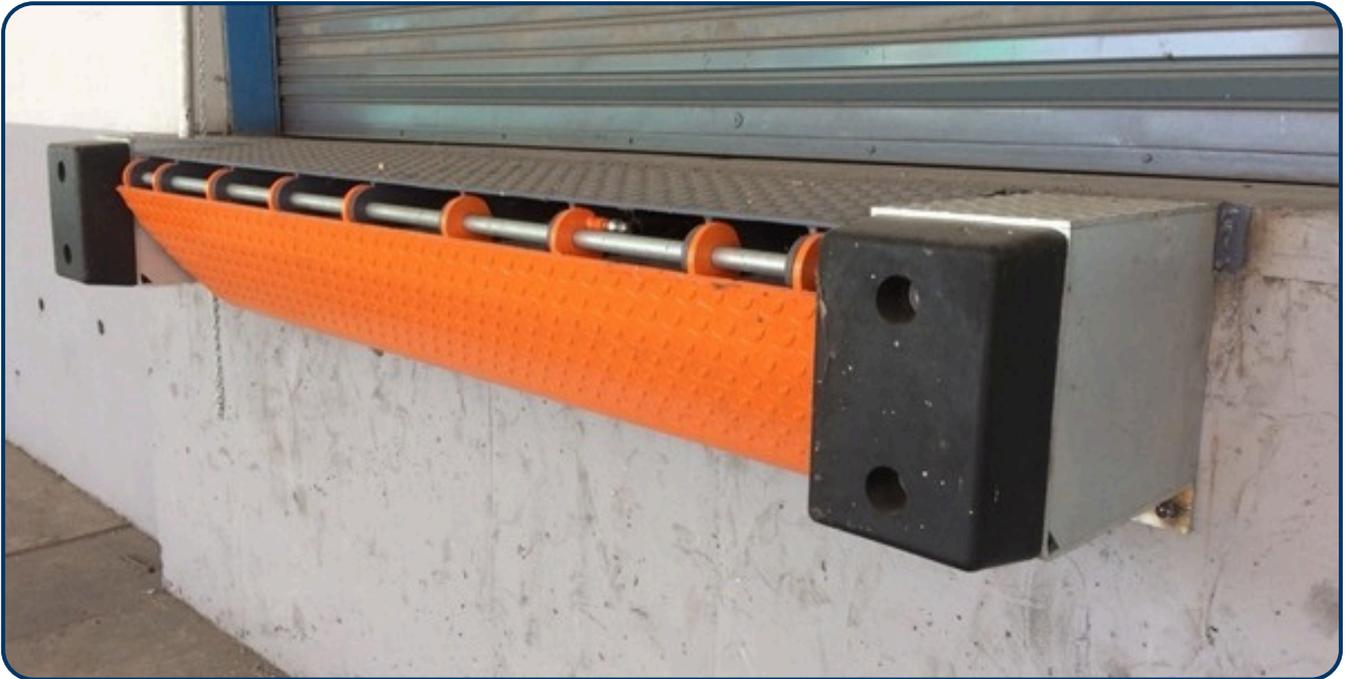

A Dock Levler is an essential loading dock device that compensates for height differences between a warehouse floor and a truck bed.

- Bridges the gap between trucks and docks.
- Made from high-strength steel.
- Equipped with anti-slip surfaces and locking systems.
- Available in different sizes and types.
- Equipped with anti-slip surfaces and safety locks.
- Designed to handle heavy loads efficiently.
- Compatible with different dock designs.

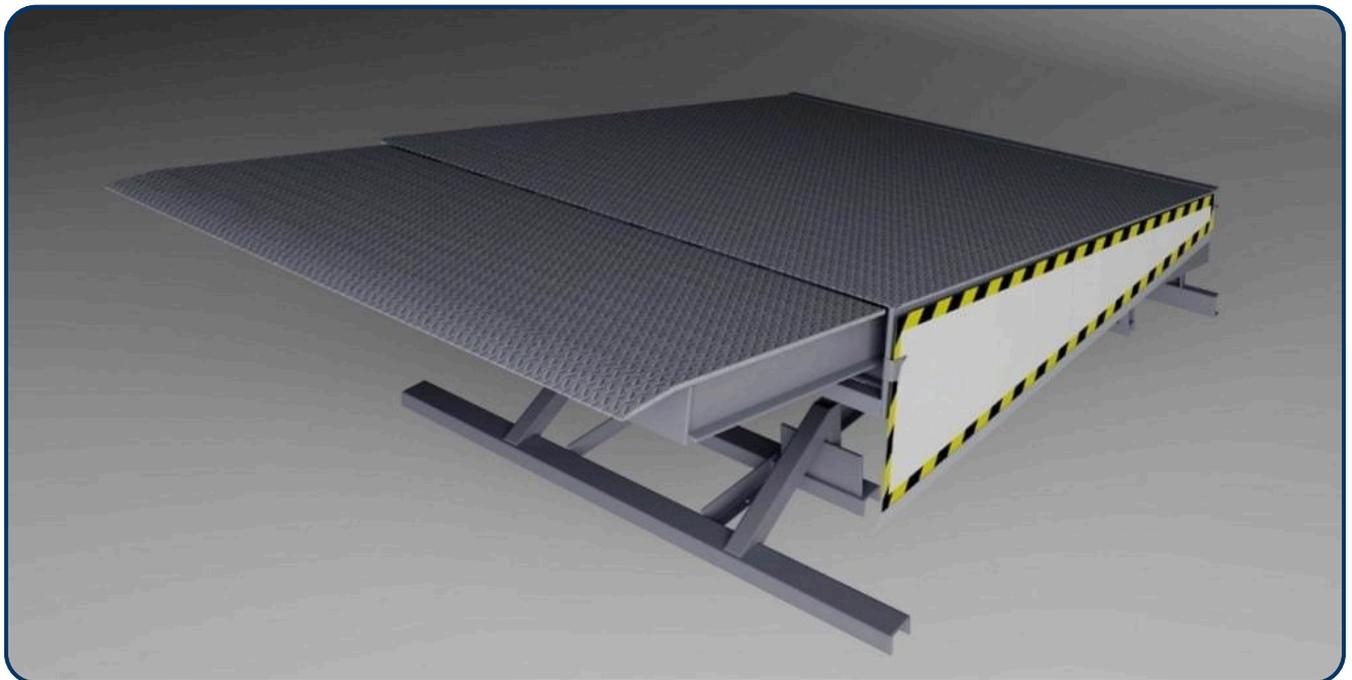

EDGE OF DOCK LEVELER

- Ideal for docks with limited space.
- Simple push-down or hydraulic activation.
- Made from heavy-duty steel for longevity.
- Bridges small height gaps between dock and truck.
- Supports heavy forklifts and cargo.
- Fewer moving parts for reduced upkeep.
- Affordable alternative to full-size dock levelers.

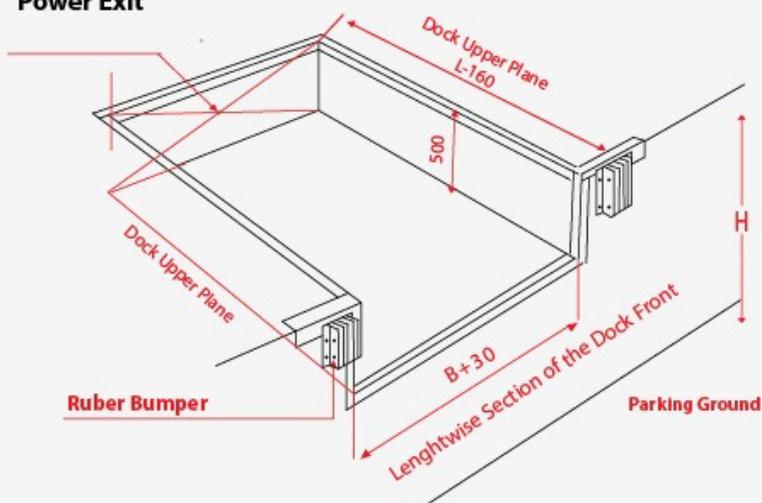

TELESCOPICS DOCK LEVELER

- Ideal for docks with limited space.
- Simple push-down or hydraulic activation.
- Made from heavy-duty steel for longevity.
- Bridges small height gaps between dock and truck.
- Supports heavy forklifts and cargo.
- Fewer moving parts for reduced upkeep.
- Affordable alternative to full-size dock levelers.

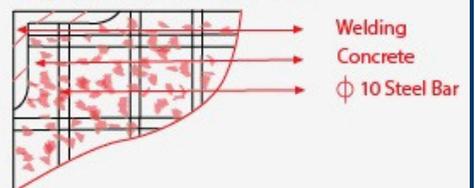

(Unit : mm)

Power Exit

Angle Installation Schematic

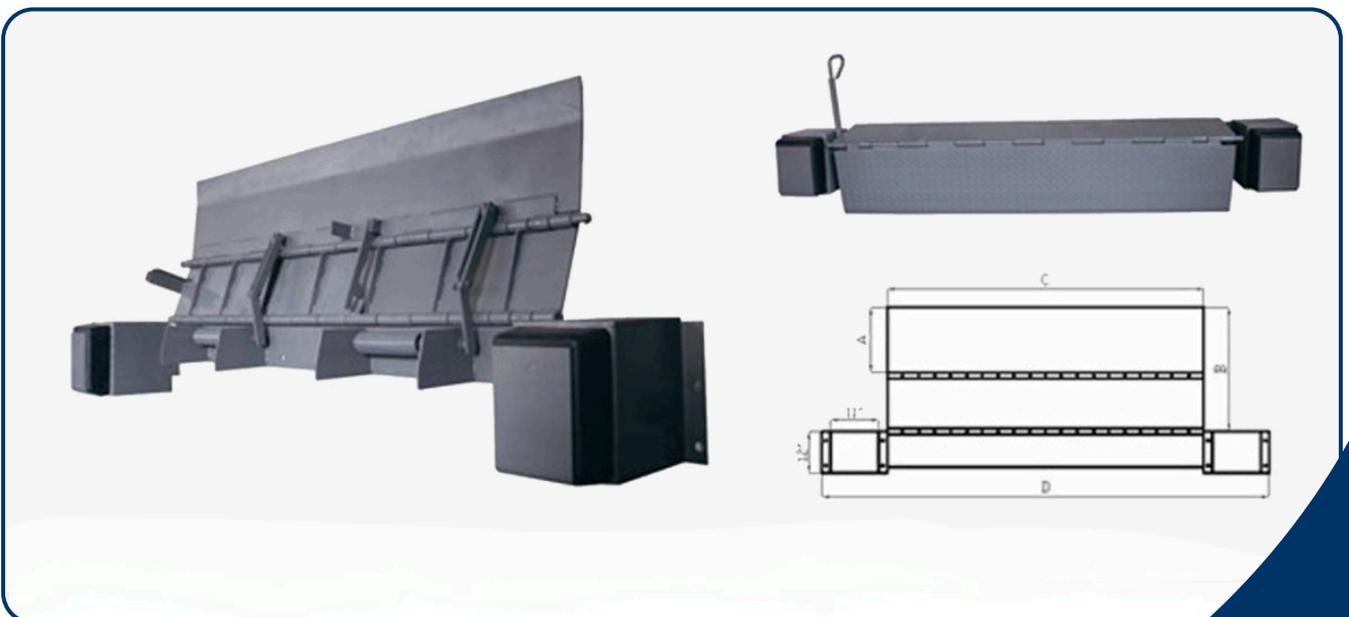

Angle Specification : $\angle 80 \times 80 \times 8$

There is one welding between steel bar and weldig section every 300 mm on the angle .

EDGE OF DOCK LEVLER MANUAL

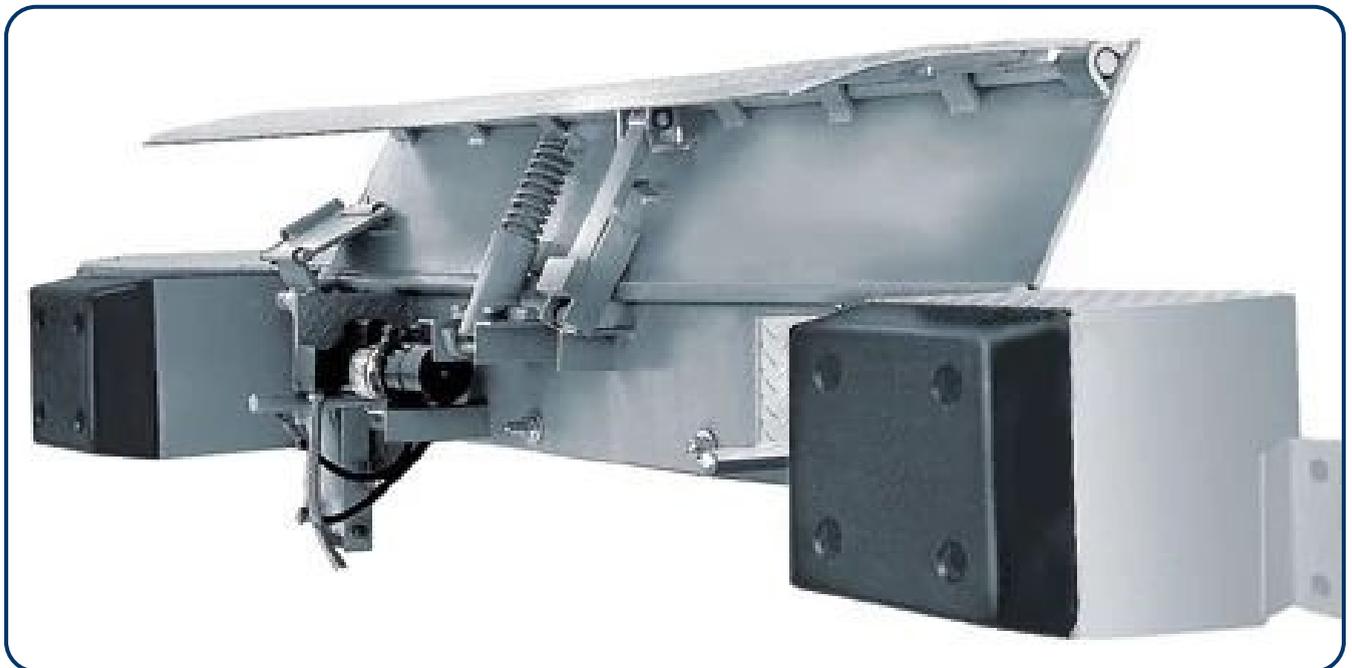

- Space-saving, ideal for limited dock areas
- Easily installs directly onto the dock face
- Lever or spring-assisted for easy lifting
- Operates without electricity or hydraulics
- Made of robust steel for durability
- Typically supports 20,000 - 30,000 lbs
- Designed for user-friendly operation
- Stays securely in place when not in use
- Protects both dock and trailer from damage
- Simple design with fewer moving parts

EDGE OF DOCK LEVLER

HYDROLIC

- A hydraulic dock leveler is a loading dock device that helps bridge the gap between a truck trailer and a warehouse floor.
- Powered by an electric motor for smooth, reliable lifting.
- Simple operation for raising and lowering.
- Steel deck with reinforced support beams.
- Automatically extends to create a bridge to the truck bed.
- Includes toe guards, emergency stop, and velocity fuse.
- Typically ranges from 25,000 to 100,000 lbs.
- Sealed components for durability.
- Returns to stored position when not in use.
