”SMART SOLUTION FOR A SMARTER FUTURE”

Established in 2016, RISING AUTOMATION has been a leading provider of advanced automation solutions, delivering excellence in automatic doors, sliding gates, boom barriers, dock levelers, dock shelters, access control systems, and industrial security solutions. With years of expertise and a commitment to innovation, we have successfully catered to residential, commercial, and industrial sectors, providing high-quality, durable, and technologically advanced products. Our automation systems are designed to enhance security, efficiency, and convenience, integrating smart technology and precision engineering for seamless operation. Whether it's automated entry systems, traffic management solutions, or warehouse loading dock equipment, we ensure that our products meet the highest standards of quality, safety, and reliability. At RISING AUTOMATION, we prioritize customer satisfaction, offering customized solutions, expert consultation, professional installation, and dedicated after-sales service. As a trusted name in the automation industry, we continue to push the boundaries of technology, making spaces smarter and operations smoother.

SLIDING DOOR

Sliding doors are space-efficient and stylish door solutions that operate by gliding along a track instead of swinging open. They are widely used in homes, offices, commercial spaces, and industrial settings due to their ease of use, modern aesthetics, and functionality.

Single Leaf Sliding Door – Features one sliding panel that moves to the side, ideal for small entrances in homes and offices.

• **Double Leaf Sliding Door** – Consists of two sliding panels that move in opposite directions, providing wider access for large openings like hospitals and commercial buildings.

- Ideal for areas with limited space.
- Available in glass, wood, aluminum, and more.
- Can be tailored to suit different interiors and exteriors.
- Helps maintain indoor temperature with insulated options.
- Equipped with locking systems for added safety.

AUTOMATED SLIDING DOOR

Automated sliding doors are modern entry solutions designed for seamless and hands-free access in various settings, such as commercial buildings, hospitals, malls, and offices. These doors use sensors and motors to open and close automatically, improving convenience, accessibility, and security.

FEATURES

- Detect movement to trigger door opening.
- Prevent accidental closures on people or objects.
- Helps maintain indoor temperature by minimizing air exchange.
- Available in various materials, sizes, and styles.
- Smooth and noise-free movement for a comfortable experience.
- Can integrate with access control systems for restricted entry.

MANUAL SLIDING DOOR

Manual sliding doors are a practical and space-saving door solution commonly used in homes, offices, and commercial spaces. Unlike automated doors, they require physical effort to open and close but offer simplicity, durability, and cost-effectiveness. These doors slide along a track system, making them ideal for areas with limited space.

- Slides horizontally, eliminating the need for swing clearance.
- Operates on a track system for effortless movement.
- Available in glass, wood, metal, and composite materials.
- Built to withstand frequent use with minimal maintenance.
- Can be tailored in size, design, and finish to match any decor.
- More affordable than automated doors, with easy installation.

COMPATIBILITY SLIDING DOOR

AUTOMATED

- Opens and closes automatically
- Uses sensors and motors
- Hands-free, effortless access
- Helps maintain indoor temperature
- Can integrate with access control systems
- Higher initial cost due to automation
- Requires regular sensor and motor checks.

MANUAL

- Requires physical effort
- Slides on a track manually
- Basic, user-dependent
- Minimal insulation control
- Standard lock options
- More affordable
- Low maintenance
